things I remember :-

I remember Zeppelins coming over in first World war
I lived at Higher Black in those days.

I remember an Airship breaking loose from its moorings
in Wals passing over Watergrove and coming down
at Wakefield, I think it had two people on.

I remember hearing trams passing up and down Whitworth
valley on a quiet night at Watergrove, also sounds ~~are~~ used
to echo a lot at Watergrove, I think being between two
Valleys at Watergrove had something to do with this.
I have also heard it said a farmer could not keep
a bull to any age owing to the echo of its sound coming
back sending it mad.
